## Prescriptions

There is no cost to you for certain preventive prescriptions. For others, you pay the full cost of the drug until you meet the annual deductible, then you pay 20%, just like any other eligible medical expense. There are no copays.

## Family coverage

How you meet the family deductible and out-of-pocket maximum are different than in a traditional PPO.

If you cover a dependent:

- Individual limits don't exist.
- All covered family member expenses are combined to meet the family deductible and out-of-pocket maximum.
